

About YPO

YPO provides procurement solutions for public sector organisations to set up or renew contracts for a wide range of services. Established in 1974 by a group of 13 local authorities, we're one of the largest public sector buying organisations in the UK and we're still 100% publicly-owned today. We work closely with our suppliers and collaborate with other public sector buying organisations to achieve efficiencies and value for money, returning all our profits back into the heart of the public sector. Our team of qualified procurement professionals can offer advice, guidance and expertise on procurement, as well as regular engagement and communication to make sure your objectives are achieved.

Overview

| | |
|--|--|
| Start date: | 13 October 2021 |
| Expiry date: | 12 October 2025 |
| Extension(s) (if applicable): | Not applicable |
| Contracting authority (CA) call-off period: | CAs can specify a contract period, based on the term that will best suit their requirements. YPO generally recommend a call-off period of no longer than 5 years |
| Contract notice ref. no: | 2021/S 000-016869 |
| Potential maximum value: | £50m |
| Rebate: | 1.5% paid by provider |
| Geographical location(s): | National |

Specification, overview and lot structure

The Health and Social Care Equipment and Associated Services framework will allow contracting authorities (CA's) NHS trusts and other public sector organisations to source their health and social care equipment and associated services via a compliant route to market. It will help to address budgetary pressures, creates efficiencies, and realises value for money.

The framework is here to support a variety of public sector colleagues in procurement, commissioning and service delivery teams including equipment stores.

The overall objective is to provide a flexible route to market so that customers can access the right types of equipment to cover a range of requirements, from supporting people to remain independent and stay in their own homes for longer and/or a provision in care environments.

The framework consists of two lots.

Lot 1 – Health and Social Care Equipment and Associated Services

Service users have an assessment and if their needs meet local eligibility criteria, equipment is provided. The type of equipment and services covered within the scope of this lot will help support this process.

Managed service

Lot 1 is aimed at customers who are seeking a 'strategic' procurement solution for all their health and social care equipment and associated services who wish to deal with only one provider – the sole provider.

The sole provider NRS will work with the customer to provide a service to cover all community equipment service needs. They will discuss the current challenges with equipment, their equipment requirements and whether any of the associated services, are required. By putting all the customers equipment requirements through this lot will enable NRS to achieve economies of scales and therefore ensuring best value for your local authority, NHS trusts, and other public sector organisations.

Being able to provide NRS with typical equipment list(s), specifications, including estimated annual volumes is helpful.

It is NRS's responsibility to work with their supply chain to source the customers equipment needs and offer them suitable products or close technical equivalent (CTE's) to meet their requirements. This may also involve offering equipment demonstrations to the customer. NRS recognise some of the challenges of moving to a new arrangement and can support this process by including their specialist OT's in the decision making process.

NRS will agree with the customer, stocking levels of each product, to ensure sufficient stocks are always available for their call-offs and will be agreed at contract implementation to alleviate potential out of stock situations.

An output from the above process, will be a defined equipment list, with set prices for customers to use to call off from.

For a managed service contract, please allow up to 12 weeks turnaround from initial call-off to full implementation of contract.

Whilst customers can do individual purchases for items of equipment, the managed service is aimed at ongoing relationships for all the customers services and equipment requirements, which will be called-off regularly into their own stores and/or service users homes.

Delivery prices were obtained as part of the tender process and are available, but please note that these are for information only and the associated delivery costs will be agreed with the customer at call-off stage, dependent on their individual requirements.

Pricing schedule – equipment

In addition to the managed service part of this lot, there is also a set price list for commonly purchased equipment products, which customers can direct award from. The prices are per product and a quantity of one and the prices will be held for 24 months from the establishment of the framework. If the customer requires multiples of products, then an option would be available to request a bespoke quotation based on their requirements, as they may benefit from economies of scale, ensuring best value for money. The purchase order would be placed directly with NRS.

Product areas and services within the scope of the goods and service provision will include but is not limited to:

| | |
|--|--|
| Daily living aids | Kitchen aids |
| Bariatric equipment across all within the scope | Equipment for people with sensory impairments – visual and hearing |
| Walking aids and tubular steel products | Multi-sensory equipment |
| Postural support equipment – paediatric and adult | Wheelchairs and accessories |
| Ergonomic equipment and chairs | Hoists, lifting equipment and accessories |
| Paediatric equipment, cots, beds, changing equipment | Pressure area care |
| Specialist chairs | Beds and accessories |
| Seating and accessories | Patient moving and handling equipment |
| Bathing/showering non-electrical equipment and adaptations | Dementia care products |
| Bathing electrically powered | Access ramps |
| Toileting equipment and adaptations | Patient ramps, temporary steps and step climbers |
| Internal and external grab rails | Medical products |

Rehabilitation and therapy products
and equipment

Equipment demonstration, training,
advice and support

Health and social care assessment and support services

Associated services

Health and social care assessment and support services are also available with this lot, types of services covered are occupational therapy assessments, trusted advisor service, blue badge assessments and self-funder support tools.

Lot 2 – Service and Maintenance of Health and Social Care Equipment

Lot 2 enables customers to access providers to service and maintain their equipment which will meet the health and safety requirements for providing equipment to service users.

The indicative types of equipment covered within this lot, are listed below:

Bariatric equipment across all areas within
the scope

Multi-sensory equipment

Paediatric walking frames, postural sup-
port stands, prone standers

Wheelchairs and accessories

Ergonomic equipment and chairs

Manual and electric hoists and accessories

Postural support equipment

Pressure area care

Specialist chairs

Beds and accessories

Seating and accessories

Patient moving and handling equipment

Bathing/showering non-electrical
equipment and adaptations

Access ramps

There are set pricing schedules available for lot 2. These are split down by maintenance service charges (standard and out of hours rates) and servicing of existing equipment. The prices detailed in the pricing schedule will be held for 24 months from the establishment of the framework.

The providers have confirmed that their engineers/technicians have undertaken the necessary training and hold the relevant qualifications and vetted with all British Standards, CE Certification, UK Legislation and Regulations, the manufacturers specification, Health and Safety Executive Guidance, Accepted Codes of Practice, LOLER 1998 and PUWER 1998.

There are options available within this lot for the customer. They're able to do a direct award based on the pricing schedules and specification or run a further competition based on their individual requirements.

Providers were asked which geographical regions they would like to offer their service and maintenance service to and you will find these details in the providers section.

Benefits of using the framework agreement

YPO's framework agreements are established to allow customers to purchase goods, works or services from providers via either direct award or further competition.

- Lot 1 – access to a sole provider and supply chain which allows you to choose your own equipment flexibly via a managed service, pricing schedule for most common equipment types and the opportunity to call off associated services, if required
- Lot 2 – confirmed pricing schedules for service and maintenance to allow direct award or option to undertake a further competition, if required
- Lot 2 - providers have been awarded geographically and you can directly call-off from the framework or have the option to undertake a further competition exercise
- Pre-defined specifications for both lots, option to amend to individual customer requirement
- Customers can choose to specify or provide amended Call-Off Terms and Conditions to those contained within the original framework agreement, as necessary to meet their own requirements
- Customers may wish to undertake a multi-lot call-off via direct award under the framework, provided the same provider(s) are appointed to each lot. Where this is the case, a direct award can be made to a provider if the participating customer can demonstrate the selected provider offers the most economically advantageous offer for both lots
- Document templates available for further competition, Call-off Order Form, Confirmation of Award
- YPO can fully manage your further competition (call-off), if required
- Reduced timescales – customers do not need to run a full OJEU procurement if procuring via the framework agreement
- Assured provider standards – providers are 'pre-qualified' as to their general suitability
- Aggregation of spend – customers will receive the benefits of the aggregated spend volume and increased leverage in the market

How to award/call-off from the framework

To access the framework agreement, customers should complete and return the Non-Disclosure and Customer Access Agreement, you can find a copy of the template on the framework page on the website: www.ypo.co.uk/frameworks-home/900601#details

Lot 1 - Direct award only

The selection/award criteria used to establish the framework agreement and acceptance of the provider onto lot 1 was:

| CRITERION | PERCENTAGE WEIGHTINGS |
|-----------------------------|-----------------------|
| Quality | 60% |
| Price | 20% |
| Sustainability/social value | 10% |
| Net zero – carbon reduction | 10% |

Lot 2 – Direct award and further competition

The selection/award criteria used to establish the framework agreement and acceptance of the providers onto lot 2 was:

| CRITERION | PERCENTAGE WEIGHTINGS |
|-----------------------------|-----------------------|
| Price | 60% |
| Quality | 20% |
| Sustainability/social value | 10% |
| Net zero – carbon reduction | 10% |

Direct award

Direct award is an efficient and simple process. Lot 2 providers were ranked based on the evaluation of the tender exercise. Customers should consider the providers in order of rank and can direct award to the provider that represents the most economically advantageous offer based on their requirements.

Provider ranking:

1. Medequip Assistive Technology Ltd
2. NRS Healthcare
3. Millbrook Healthcare Ltd

Further competition

Customers can also run a further competition which reopens competition to establish their exact requirements.

When undertaking the further competition, customers need to invite all providers to submit a bid in response to their individual requirements. Any changes to the Call-Off Terms and Conditions or amended clauses in the specification all need to be made clear to providers so that they can ensure this is taken into consideration when formulating their bid.

When running a further competition, customers are required to use the same criteria that was used in the original tender (price, quality, sustainability/social value, net zero – carbon reduction) and can choose whether to carry the original scores through or reopen each criterion to competition.

When a criterion has been reopened for competition, customers can amend the weighting by +/- 10% from that used in the original tender (as described in the table

| CRITERION | ORIGINAL TENDER WEIGHTING | PERCENTAGE WEIGHTINGS |
|-----------------------------|---------------------------|-----------------------|
| Price | 60% | 50% - 70% |
| Quality | 20% | 10% - 30% |
| Sustainability/social value | 10% | 20% |
| Net zero – carbon reduction | 10% | 20% |

Evaluation must be fair and transparent and the methodologies used to evaluate must be provided to the providers within the further competition documentation, including the evaluation criteria and the weightings that are applied.

Customers should award based on the most economically advantageous tender (MEAT).

YPO can help customers produce questions, pricing schedules and evaluation criteria to undertake a further competition if required,

Clarification responses, evaluation of submissions, drafting of award letters and contracts, and applicable Contract Award Notices are elements of the process that will need to be completed by the customers. Customers must inform YPO of the outcome of any further competition they undertake themselves.

Terms and conditions

Providers awarded to the framework agreement have agreed to and signed YPO's standard Terms and Conditions. These can be amended by the CA and provider by mutual agreement to include additional terms to supplement the standard Terms and Conditions. A variation form is included in the standard Terms and Conditions document to allow customers and providers to amend any terms if required.
