

# Critical Infrastructures.

Our team of Uptime Institute Accredited Tier Designers ensure Sudlows provide a high-quality audit, design, build and maintenance service. We develop continuity plans, improve the resilience of existing data centres and build new facilities deploying the latest cutting-edge technology.

Our expertise in power, cooling and air conditioning combined with our design and testing services, ensure we can deliver every aspect of your critical facilities and infrastructures.

Sudlows are proud to maintain the highest standards in technical expertise, Quality and Health & Safety Accreditation.

- 3D Design
- BIM (Building Information Modelling)
- Planning & Construction
- MEP (Mechanical, Electrical & Plumbing) Specialists
- Generators & Uninterruptible Power Supplies (UPS)
- DCIM (Data Centre Infrastructure Management)
- Hot & Cold-Aisle Containment
- Fire Suppression & Monitoring
- Cooling & Chiller Systems
- Final Commissioning
- Professional Services and IST (Integrated System Testing)
- Facilities and Service Management
