

Better value, delivered.

Health and Social Care Equipment and Associated Services – Lot 1

Framework Ref No: 1061

Providing public sector organisations with cost and efficiency savings via a managed service and delivered by sole provider, NRS Healthcare

Source all your health and social care equipment and associated services via a compliant route to market

Regaining control of your procurement process, addressing your budgetary pressures, and reducing the amount of administration your staff may deal with are common challenges that public sector organisations and NHS trusts face when it comes to sourcing health and social care equipment and associated services.

YPO can help you address the challenges you are facing

We have identified your organisation as one that operates an internal equipment store and is likely to be buying equipment from a range of suppliers. We know from experience this is not always the most efficient approach to sourcing both in terms of the price of equipment and the overall process of working with multiple suppliers.

The Health and Social Care Equipment and Associated Services framework provides a compliant route to market so that you can access the right types of equipment to cover a range of requirements, from supporting people to remain independent and stay in their own homes for longer as well as provision in care environments, equipment maintenance and servicing.

This solution has helped other Local Authorities in a similar situation to yours.

NRS Healthcare provide a key account management approach which means they will work with their supply chain on your behalf to source your individual requirements. This will make the back-office process leaner for you as an organisation as you will no longer need to spend valuable time negotiating fees, raising invoices and arranging bulk deliveries etc.

NRS don't just add value by sourcing your equipment, their own clinical leads will work with yours to identify appropriate products/equipment to meet your service user needs and/or may introduce you to alternatives and new products to the market. Product demonstrations can also be provided, if required. Their technical teams can also advise on recycling rates, which is an important aspect when identifying product full life costings.

Benefits of the framework

The Health and Social Care Equipment and Associated Services framework is designed to provide direct access to the sole provider and supply chain, allowing you to choose your own equipment flexibly via a managed service, pricing schedule for most common equipment types and the opportunity to call off associated services, if required.

[View framework »](#)

About NRS Healthcare

NRS Healthcare provide community equipment products, wheelchairs, service and maintenance, telecare and clinical services to Local Authorities and the NHS. We deliver services to over 30 local authorities and provide a wealth of information about whole life cost of equipment and recycling rates. NRS Healthcare has full clinical support with over 50 highly qualified occupational therapists to help with decision making on suitability of equipment. All services are delivered with the same core aim and objective - to enable people to live full, active, and independent lives for as long as possible.

About YPO

YPO provides procurement solutions for public sector organisations to set up or renew contracts for a wide range of services. Established in 1974 by a group of 13 local authorities, we're one of the largest public sector buying organisations in the UK and we're still 100% publicly-owned today. We work closely with our suppliers and collaborate with other public sector buying organisations to achieve efficiencies and value for money, returning all our profits back into the heart of the public sector. Our team of qualified procurement professionals can offer advice, guidance, and expertise on procurement, as well as regular engagement and communication to make sure your objectives are achieved.

YPO's experienced team are also on hand to help you through every step of the process – offering practical advice and support when you need it. For more information, please contact:
