## Introducing Print Marketplace

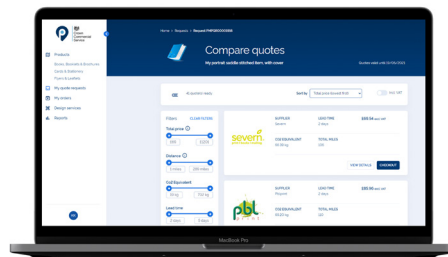

With an increasing demand for public sector bodies to maximise budget savings, support local employment, and make responsible buying choices, many organisations are searching for new ways to help balance these objectives.

Exclusively for the public sector, Print Marketplace is a revolutionary new online marketplace for ordering print which has been developed by APS Group, in partnership with the Crown Commercial Service and YPO to meet public sector market challenges.

Print Marketplace has been designed with simplicity and compliance at its core enabling users to support the Government's digital strategy whilst re-invigorating the UK print supply chain and supporting social values.

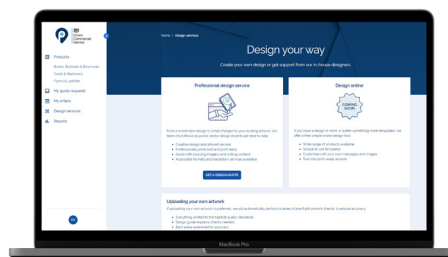

### How does Print Marketplace work?

Once registered and verified, buyers will have access to 100's of pre-approved suppliers. They simply need to specify their print and design requirements and upload artwork plus the Print Marketplace designers are on hand for any additional help that is needed. Next, buyers can choose from a range of competitive prices based on filtered selections such as location, CO2 emissions or SME status. Then, they just choose the right supplier for the job and can submit the project.

### Why switch to using Print Marketplace?

Print Marketplace has been created in consultation with the public sector, to ease current challenges facing organisations when procuring print. The intuitive platform enables users to search for the right supplier for any project all in one place. This also speeds up repeat ordering processes as all previous order history across multiple suppliers is saved for future access.

There's a host of other benefits too;

- ✓ Free to register and use the site, with no licence or software required.
- ✓ Intuitive platform supported by clear guides, FAQs and backed up by an experienced Customer Support Team.

- ✓ Aids home working and delivers on social values including promoting Covid recovery, tackling economic inequality and supporting local recruitment, skills and investment.
- ✓ Fully transparent and compliant way of purchasing print.

Print Marketplace is a genuinely market-leading solution. It allows customers from the entire public sector to purchase quality print products and, in doing so, save time and money while meeting their social value obligations.

**Dave Duncan, Crown Commercial Service's Head of Document Management and Logistics**

To trial the system a range of free platform demos are available for any public sector organisation to experience Print Marketplace. It's the perfect opportunity to see the capabilities of the platform and ask any questions.

To register your interest, please email [printmarketplace@theapsgroup.com](mailto:printmarketplace@theapsgroup.com) or contact Tim Aggett on **07813 920838**.
