

West Yorkshire Police use SCC.

“SCC showcased its services expertise and delivered to extremely tight deadlines, solving a business problem which in turn will reduce crime and save lives.”

In a project notable for its three-week timeline, SCC enabled West Yorkshire Police, who is responsible for the National Police Aircraft Service (NPAS), to create and distribute an application accessible by forces nationally to launch Police Aircraft across the UK.

It would have been a major embarrassment to West Yorkshire Police if the committed service go-live to other forces was not achieved, putting SCC under huge pressure to meet the deadline.

SCC used a Citrix-based solution, with a view to providing further appropriate technology for desktop virtualisation to whole forces and regions upon project delivery.

Having been let down by a previous partner, West Yorkshire Police trusted SCC to step in and complete the project on time and to budget.

Public Sector Executive Steve Greig said: *“This project delivered real value to the Police sector.”*

“SCC showcased its services expertise and delivered to extremely tight deadlines, solving a business problem which in turn will reduce crime and save lives.”
