

Welcome to your Energy.Hub.

Connecting customers, consultants and suppliers through one integrated, cloud-based platform.

The Energy.Hub allows you to access all your data in one central platform so you can manage your energy portfolio more easily and efficiently, keeping you in control of your energy estate.

We believe the foundation for successfully managing your portfolio starts with good, quality data. This means that you can manage your site, consumption and pricing data all in one place and ensure adequate quality. From here you can identify valuable insights on site consumption, pricing, data analytics through our reporting tools and analyse your opportunities in energy and carbon reduction.

1. Manage Your Data

Manage all your energy data in a single cloud platform, equipped with lots of easy to use tools to check the completeness and accuracy of the data.

2. Empower Your Teams

Eliminate over 67% of the administration processes between you and your partners, by having everyone log into one central platform. Say goodbye to sending spreadsheets back and forth.

With unlimited user access, and full control on what each user sees, you can make sure everybody in your estate has the data they need.

Welcome to your Energy.Hub.

Connecting customers, consultants and suppliers through one integrated, cloud-based platform.

3. Analyse Your Opportunities

With in-built bill validation, energy analytics and energy procurement, you and your team have access to a suite of powerful tools that help you plan, manage and track opportunities to save cost, carbon and consumption within your estate.

4. Engage and Automate Savings

Once you have analyzed the opportunities, you can begin to put into place powerful automation to help you ensure the savings are delivered.

Create alerts and triggers to track energy processes. Automate key reports for your on-site teams and service providers, generate leaderboards to have sites compete on energy savings.
