

Energy

Contracts, billing and communications with your energy supplier should be simple and straightforward. We help MAT's achieve significant savings on tariffs and management fees by centralising electricity and water contracts. You might even be considering renewable energy. We can provide access to service agreements for electricity, lighting, solar panels, biomass fuels and much more.

Highlights

- + Typical savings of 10% compared to the average market rate
- + Low cost automated readings to identify and eliminate energy waste
- + Online portals to monitor consumption
- + YPO makes buying your energy simple - we deal with the utility companies on your behalf
- + YPO can assist you with your funding applications
- + Bill validation service - free to MATs
- + Knowledge sharing through monthly newsletters, events and webinars
- + Assist MATs in reducing VAT and Climate Change Levy liability

Added Value

- + Pre-qualified suppliers
 - + Giving you a confidence in their quality of service/products
- + Reduced timescales
 - + No need to pre-qualify suppliers or publish requirements by OJEU
- + Easy to use
 - + You only need to identify their requirements, present these to the market and award a contract
- + Fully EU Compliant
 - + All YPO service agreements are fully legal and in line with EU regulations

Why YPO?

- + Not-for-profit organisation
- + Free support and advice from YPO's procurement experts
- + Free benchmarking
- + A dedicated account management team
- + Access to CPDs and MAT forums
- + Loyalty scheme for academies
- + Nationwide service agreements
- + Over 40 years' experience in the education sector

Energy Service Agreements

	<p>Electricity / Gas</p>	<p>Join over 3,500 schools and academies purchasing their gas and electricity through YPO. As YPO is a not-for-profit organisation we are able to offer low management fees and best value to all customers, saving you up to 90% on broker fees.</p>
	<p>Liquid Fuels</p>	<p>This service agreement provides schools and academies with heating oils and automotive fuels. The five national suppliers on the agreement offer wholesale pricing with competitively low management fees.</p>
	<p>Low Carbon Electrical Micro-generation</p>	<p>With the increasing focus on climate change and energy solutions we are helping more and more schools and academies to implement projects for solar panels and wind turbines. This service agreement covers the entire project process from feasibility and design to installation, commissioning and maintenance.</p>
	<p>Low Carbon Heating Systems</p>	<p>Are you looking for a way to reduce your energy bills, improve building efficiency and benefit from available government incentives? This service agreement includes the design, supply, installation and maintenance of low carbon heat and combined heat and power systems, including biomass boilers, air source heat pumps and solar thermal hot water systems.</p>
	<p>Low Energy Lighting & Heating</p>	<p>Optimised lighting has been proven to aid concentration in lessons and improve pupil wellbeing. Through this service agreement you can access a full design service, supply, fitting and maintenance of low energy lighting systems. These lighting systems can offer a quick return on investment and YPO can assist with your funding applications.</p>
	<p>Metering</p>	<p>By monitoring and measuring your energy usage you can establish a baseline and your current energy use, detect waste quickly and can easily compare consumption against benchmarks to determine potential savings. This service agreement provides the supply, installation, commissioning and maintenance of heat, water, gas and electricity meters.</p>
	<p>Solid Fuels</p>	<p>This service agreement includes the supply of solid fuel to heat schools and academies nationwide. This includes biomass pellets, chips and coal for schools using the traditional coal-fired boilers. Purchasing solid fuel through this agreement has seen many schools save up to 25%.</p>
	<p>Water</p>	<p>From April 2017 you are able to choose your water and waste water retail services provider. YPO have collaborated with other buying organisations for this service agreement to help deliver better value for money, offer improved customer service and assist you in becoming more water efficient.</p>
