YPO[®]

MEDIANA HEARTON AED A15

Suitable for education settings such as:

- Schools and academies
- Sixth form and further education colleges
- Pre-schools and nurseries
- Playgroups
- Holiday and out-of-school providers

Equip your school today with affordable Mediana defibrillators

Unfortunately, many instances of sudden cardiac arrest prove fatal due to the lack of availability to rapid and effective treatment. Chances of survival can be drastically improved by having access to defibrillators.

To support pupils with medical conditions, national guidance advises schools to consider purchasing an AED as part of their first aid equipment.

In an attempt to save lives and prevent deaths from sudden cardiac arrest, the government aims to provide defibrillators to all state-funded schools in England by the summer of 2023.

The use of a defibrillator could lead to better survival rates for victims. It is recommended that this life-saving piece of equipment should be installed in every educational setting across the country to potentially save the lives of not only pupils, but staff and visitors as well.

Thousands of schoolchildren are set to benefit from this move. Mediana A15 defibrillators are now available to educational establishments throughout the UK at subsidised rates from preferred suppliers. Over 3,500 AEDs have already been supplied to schools in England and Wales.

MEDIANA HEARTON AED A15

- For every one-minute delay, a victim's chance of surviving a sudden cardiac arrest drops by 7-10%.
- Sudden cardiac arrest is the leading cause of death among school-aged children.
- CPR effectively administered immediately after sudden cardiac arrest, can double the chance of survival for a victim.
- Two out of three sudden cardiac arrest related deaths in children occur during physical activity.
- The government has a target of providing all state-funded schools in England with a defibrillator by summer 2023.
- Early defibrillation can triple a victim's chance of survival.
- More than 30,000 cardiac arrests occur every year outside of a hospital setting.
- Defibrillation, dialling 999, and performing CPR could save a life.

The Mediana AED:

- Has a unique adult/child setting available at the flick of a switch.
- Is exceptional value.
- Has a low lifetime cost.
- Is easy to use and completely safe.
- Requires no experience or formal training.
- Comes with a free tutorial guide with every purchase.
