

IT expertise. innovation.
world-class service.

We use Net Promoter Score®, a recognised measure of customer satisfaction. 70%+ is recognised as 'world-class' and that's our aim.

The pure technology group is a leading provider of ICT services and solutions to SME, corporate and public sectors, including some of the UK's largest automotive retail groups. Technology is designed to match customer strategy: cloud, hybrid, on-premise and mobile from datacentre to device.

customer success

some solutions we're really proud of...

“John Mason International selected the pure technology group following an intensive tender process at the beginning of 2019. We were initially very nervous having been with our previous supplier for many years. From our first initial conversation through to the start of the first project together we have found PTG to not only be knowledgeable but also very efficient. Our first project was done with no downtime or interruptions to our services. The project was completed smoothly and efficiently.”

- Becky Clamp, IT Manager, John Mason International

pureDR

- Improved customer experience.
- Scalable and reliable infrastructure.
- Cloud-based technology for DR.

purecloud

- Flexible and cost effective solution.
- Optimised IT performance.
- Work anywhere mobility.

“Our previous system was no longer able to serve our needs and was causing us problems with some of our business critical applications, such as digital dictation as well as speed and reliability becoming a factor for some of our more rural offices. We needed a secure, reliable and flexible system that could be tailored to our exact needs. Our staff are increasingly looking to work on the move, at home and across offices, so being able to provide a system that could meet these needs, whilst still maintaining a high level of security was paramount in our decision. purecloud and the PTG team have delivered on this and we have been impressed with the service.”

- Danny Garland, IT Manager, Harrowells Solicitors

pureinfrastructure

- Reduced total cost of ownership.
- Improved ability to increase capacity.
- Better responsiveness.

“We trust pure technology group's recommendations totally. They're very knowledgeable and we've always had a good relationship with them. When they introduced us to Huawei we were immediately impressed. The innovative combination of SSD, mixed tier storage and scalability at a great price was just what we wanted.”

- Stuart Feaviour, IT Coordinator, Fuel Card Services

puresecurity

- Increased IT security through a tiered solution.
- Secure data back-up and archiving through the cloud.
- Improved customer service through mobile platforms

“Ultimately our customers benefit as we're able to get back to them much faster. We're able to answer queries, take orders and service any issues they may have. With our new security strategy and solutions in place, I'm now confident we can protect against increasing cyber-threats.

Partnerships with businesses such as the pure technology group and Microsoft are important to our business. We've relied heavily on partnerships for the last 100 years and we need to keep these partnerships going. We needed to look to the future, and the future is a cloud.”

- Steve Norton, Group Network Manager, John Cotton Ltd

purecloud

- Reduced licensing spend by 25%.
- Enhanced security.
- Service Desk support.

“We have been working with PTG for several years now and I can't imagine using any other IT provider. Everyone I have dealt with at PTG has always been extremely understanding of our IT requirements and have always delivered what we need in a professional, cost-effective and timely manner.”

- Chris Gensmantel, Head of IT, JCT600
